

Still Photography

Guide for Students

Camera Basic Guide

- Ensure camera is correctly adjusted for **normal use** or **close ups** (macro)
- Zoom = up/down selection buttons.
- Camera mode and review via rotating selector at top.
- For download, set to review.

No need to adjust menu – camera has been optimised before use.

- **Take more than 1 photo** for each shot and use the best.
- **Rename photos on PC** with a meaningful name.
- **Download photos to PC** before attempting to edit.
- **View 'Thumbnails'** in Explorer to preview photos.
- **Edit photos in Photofiltre** (right click>edit with photofiltre).
- **Reduce the size of photos** for use in Publisher, PowerPoint etc (Photofiltre: right click>image size and adjust %). Large photos can cause PowerPoint to crash.

Note:

Downloading photos from camera is your responsibility. Cameras left in the computer room will be wiped ready for use by other pupils.
