

Setting up your Android device for wireless access at school

These instructions are provided as guidance only, and may differ on your specific device. If you are unable to connect following these instructions, use the instructions intended for non-IOS/Android devices. KEGS cannot accept responsibility for any damage/problems incurred on personal mobile devices.

On your Android device, go to Settings - Wi-Fi.

Connect your device to 'BYOD-Activate'.

Using your device's native internet browser (not Chrome), navigate to https://10.10.5.253/activate and click 'Continue' if you see a security certificate warning.

Enter your network username and password (e.g. cwright_staff) at the Ruckus Wifi Connection Activation page and tap Log In. WiFi Automatic Config app will be downloaded.

When the app has downloaded (a small down arrow will appear at the top of the screen), pull the screen down and tap on 'prov.apk'. Tap Install. Tap Open. Tap 'WiFi Automatic Connection'. The wireless settings profile will then be installed.

Go back to the Wi-Fi settings, and 'Forget' BYOD-Activate.

Connect your device to 'BYOD-KEGSStaff' or 'BYOD-KEGSStudents' as appropriate if it is not already connected. You should now be able to browse the internet.
